### Invitation for Corporate Membership

The ABRF has been organized for the following purposes:

- *To promote and support resource facilities, research laboratories and individual researchers regarding operation, research and development in the areas of methods, techniques, and instrumentation relevant to the analysis and synthesis of biomolecules.*
- *To provide mechanisms for the self-evaluation and improvement of procedural and operational accuracy, precision and efficiency in resource facilities and research laboratories.*
- *To provide a mechanism for the education of resource facility and research laboratory staff, users, administrators and interested members of the scientific community.*

In order to accomplish these goals, the ABRF needs to work closely with corporations building the technology and marketing the methods which we use in our laboratories. The ABRF would like to invite your partnership in our organization. The following levels are available:
